

The Vista-21ip Security and Fire System

Honeywell

- Monitor Through the Internet
- Faster Mode of Communication
- GSM Radio Ready
- Total Connect Ready
- Easy to Use
- Graphic Keypads Allows Customized Photo

Ideal Choice for Applications where the Internet is the Primary Path of Communication

Honeywell's Vista-21ip is a feature-rich security and fire panel that is secure, reliable and includes the option for internet monitoring and digital communications via GSM, all in one system.

The built-in Internet Communicator allows you to monitor through the Internet, as well as the option for using Honeywell's Total Connect Internet interactivity feature, which gives you remote system control. This feature can send information about your system anytime through SMS text messaging devices, including cell phones and PDAs.

For the ultimate in convenience, comfort and control, Honeywell offers the graphic touchscreen keypad (above). It allows you to record messages, customize the screen with a family picture and review system actions. Handheld and keychain remote controls are available as well as medical and panic pendants.
